75% OF F.A.I. AWARDS EARNED IN SCHWEIZER SAILPLANES

In 1960, 75% of all the F.A.I. awards issued by the SSA were earned in Schweizer Sailplanes. Of these, 83% were earned in the three time-tested FAA-approved models illustrated above.

More pilots than ever before are getting their FAI awards and enjoying the fun of flying a dependable Schweizer Sailplane. Why don't you join the growing number of enthusiastic owners. There is a model available for every type of soaring: training-awards-competition or just for fun.

For economy why not get a kit or uncovered ship? There's still time to get one in the air for summer soaring. Pay-as-you-go unit kits make it possible to spread out the cost of your sailplane.
